The Group remains cautiously optimistic that, despite these challenges, growth forecasts in the Southern African Development Community (SADC) remain relatively positive, and it is expected that private sector, foreign direct investment (FDI) and local investment may pick up despite foreign exchange limitations and national debt pressures in certain Group markets. The Board and management believe that there is potential to increase the Group's market share across all components through excellent customer service, innovative solutions and leveraging regional trade flows in the region, all while ensuring strong governance and simplicity of delivery. The Group continues to carefully monitor developments and market signals, particularly relating to inflation, trade, monetary policy and overall economic stability. In 2020, FCB Zambia secured a targeted medium-term refinancing facility, Bank of Zambia – Targeted Medium Term Refinancing Facility, for on-lending to customers. Interest is payable linked to the Zambia Monetary policy rate which was 8% per annum. The loan is repayable in quarterly instalments with interest. The loan was disbursed in three tranches whose maturity dates are 1 September 2023, 4 February 2024 and 8 February 2025.

Summary Consolidated and Separate Financial

(the "Company") for the year ended 31 December 2022.

Performance in 2022

FMBCH plc and its subsidiaries ("the Group") posted strong performance for the year ended 31 December 2022, with growth in operating income, income accretive assets and profits across its footprint. Customer numbers grew by 26% to over 555 000, demonstrating the Group's commitment to providing quality services that meet clients' needs. Notable performance outcomes of 2022 against the preceding year included:

- Net interest income for the year grew by 13% and total non-interest income by 8%, resulting in total operating income of USD 191.6 million a growth of 10% year on year.
 Profit after tax of USD 61.2 million was achieved up 51% from 2021.
- Loans and advances to customers are up 18% at year-end, closing at USD 651.7 million.
 Credit loss ratio on customer advances (net impairment expense as a proportion of average advances) was 0.77% (2021: 1.43%).
- Further, the Group's non-performing loans remain one of the lowest in the regional banking industry, at only 2.8% (2021: 2.9%) of the USD 664.6 million gross advances portfolio (2021: USD 565.3 million).
 Customer deposits were up 17% rising to more than USD 1.04 billion.

Zambia	10.01	4.81	108%	
Zimbabwe	11.37	9.82	16%	
Total	61.19	40.44	51%	

The Group's basic earnings per share were 1.631 US cents (2021: 1.107 US cents), delivering a return on equity of 32% (2021: 25%).

The FMBCH Group remains intent on growing into a significant regional banking brand, with a diversified portfolio of corporate, business and consumer services complemented by a strong focus on treasury and trade activities. The Group is selectively rolling out consumer lending and other retail services across its footprint. A rigorous underpinning of enterprise risk governance at country and Group level is a mainstay of its oversight process, such that capital, liquidity, and other resource allocations are made based on risk assessment, opportunity sizing, and sound data.

The global economic environment

As the world moved into the post-pandemic new order, the Russian-Ukraine conflict brought with it supply constraints on wheat, fertiliser, fuel and gas. This exacerbated inflation, thereby driving up monetary policy interest rates. In addition, the US dollar strengthened against most currencies, including those of the FMBCH Group.

Throughout these influences, the FMBCH Group continues to be well governed with a strong focus on maintaining a healthy financial position that enables long-term, sustainable performance and growth.

Macroeconomic outlook

Global economic growth is expected to slow sharply in 2023, reflecting the prolonged effects of the war in Ukraine, and other geopolitical pressures, together with high inflation and rising interest rates.

Prices are also expected to remain high, even after inflation subsides, fueling the risk of social unrest.

Dividend

The Directors have approved a second interim dividend in respect of the year ended 31 December 2022 of USD 8 312 625 (0.34 US cents per ordinary share) payable on or about 12 June 2023. The financial statements for year ended 31 December 2022 do not reflect this dividend.

Such dividend will be accounted for in equity as an appropriation of accumulated profits in the year ended 31 December 2023. In addition to the first interim dividend of 0.15 US cents per ordinary share (paid in the third quarter of 2022), the second interim dividend would bring the 2022 annual dividend to 0.49 US cents per share (2021: 0.18 US cents per share). This translates to an almost threefold growth in annual dividends. The Group's intent is to maintain a regular dividend policy going forward, subject to the Group's growth aspirations.
